

DATA SHEET **TrackBox™**

P/N: KA226-01

A man-portable, mobile deployment carrier for PackBot® capable of use with any standard hitch receiver

The Kairos Autonomi TrackBox™ attached to the standard hitch receiver of a HMMWV.

The Kairos Autonomi TrackBox™ enables remote PackBot® deployment for any dull, dirty or dangerous operation. An infrastructureless complement to any standard vehicle, the rugged TrackBox™ delivers a PackBot® without human intervention.

TrackBox™ Features

- Protects PackBot® during transport
- Internal shock suspension for cushioned ride
- Attaches to a standard hitch or bumper receiver
- Quick, simple entry and exit
- Infrastructureless support (uses PackBot® power)
- Remote deploy capable
- Battery charging port while traveling
- Enables covert PackBot® deployment

(MORE INFORMATION ON REVERSE SIDE)

An ISO 9001:2000 Registered Company • GSA Schedule Number GS-07F-0226U • Patent-pending

TrackBox™

Additional Features and Capabilities

- Front or rear bumper mount
- Metallic or camouflage surface color
- Enclosure can be armored
- High contrast guidance tracks
- Works with other robots of similar size
- Scalable enclosure design

The TrackBox™ ramp (left) allows for easy deployment of a PackBot® in a remote location. The TrackBox™ can attach to any vehicle's standard hitch receiver (above).

When combined with a Pronto4™ enabled vehicle, the TrackBox™ can be used for autonomous or tele-operated delivery of PackBot® to distant locations.

The Pronto4™ Agnostic Autonomy System converts any existing ground or surface vessel into an unmanned system in about four hours.
